

SCASCA INFECTION CONTROL SEMINAR

Everyone who works in the ambulatory surgery center industry knows that ASCs offer high quality care to our patients. Key to that quality care is each center's infection control program. These programs give centers the opportunity to demonstrate and document how they deliver care safely and with the best interest of their patients.

But how do you know if you are doing it right? With the fast pace of your center, increased regulatory changes, changing recommendations, and possibly even staff changes, it is hard to keep up and cover all the bases.

SCASCA has partnered with STERIS Corporation to provide your ASC's staff with a one-day seminar. STERIS Clinical Education Specialist, Arthur Henderson, is an infection control expert who works with ASCs daily on best practice and how to meet sterilization and infection control requirements.

Make plans now to join us and take part in this opportunity to gather and discuss industry best practices related to sterilization and infection control.
